

## Hipster

Hipster is a unique brewer, that unlike any other brewer in the market let's you choose temperature in three stages and brew method for each brewing. It is designed and manufactured in Sweden. Precision of temperature, flow-rate and pre-brew are critical factors to reach the desired extraction and to recreate the same taste experience time and again.

Hipster comes in three different models. Double and single for counter top or under counter. Hipster fits anywhere, in the restaurant, in the hotel, in the coffeebar etc. You can brew the volume that suits you right now, ranging from 150ml to 2.5L. Select the desired volume, load the filterbasket with coffee and then start the recipe you designed for just this coffee.

Hipster, due to it's precision of temperature, gives a clean taste to the coffee that makes it comparable to handbrew.

Hipster gives a positive meaning to "batchbrew".

### Temperature-stability

Exact temperature throughout the brewprocess.

### Volumes

150ml to 2,5lit. Brew from 1 cup to a full thermos.

### Unique serviceability

Easy service that keeps your down-time to an absolute minimum with M2M-communication.

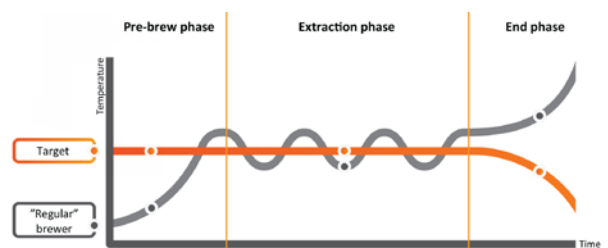

### Control & Settings

The 2grp is controlled from a built-in touchscreen and the 1grp models are controlled from a free-standing touch-pad.

### Tasteprofilng

Choose your preferred prebrew temp and time, brew temp in 2 stages, constant flow or interval.
